

As Canadians celebrate 133 years as a nation, a more modest birthday party is underway here in Prince George. Brink Forest Products Ltd. celebrates a quarter century of good citizenship. From no more than a vision, John Brink created a world class company that makes quality lumber without ever cutting a tree. Thanks to strong leadership, skilled and loyal employees and great ideas, Brink Forest Products prospers today as a leader in the forest industry.

As part of his 25th anniversary celebrations, founder John Brink says... "Thank you, Canada". His gift this summer of equipment to the Prince George Railway and Forest Museum is another example of John's generosity in giving back to the land that's been good to him.

Brink's donation is worth over \$25,000 in value - and tenfold more to buy it new. The gift means a lot to the museum. The smiles of the community mean a lot to John.

Brink Forest Products, celebrating 25 years - making quality products through innovative processes and environmental leadership.
